Crime Prevention Tip

Exercising outdoors is a great way to get active and best of all you don't have to pay a gym membership to use the outdoors. If you ever plan on working out outside, here are a few tips to help ensure your safety! First and foremost, try and find a family member or friend to exercise with. There is always safety in numbers. This rule of thumb is even more important when exercising outdoors in the dark. Criminals are able to hide more effectively in the dark and having a partner to exercise with can reduce the will in criminals to cause harm to you! Always be aware of what is going on around you and avoid poorly lit areas. If you listen to music while working out keep it at a low volume so you are able to hear other individuals and vehicles driving by. You also have the ability to arm yourself with the protection you feel best fits your needs. You can take a martial arts class, or carry pepper spray to incapacitate and run away from your assailant. You can also obtain a concealed carry permit and carry a firearm while exercising. If you decide to go that route we ask that you do your research, take the proper classes and above all please follow the law. You can find the information at flsenate.gov. With these tips, you can help ensure that you have a healthy, fun and safe exercise session.

Police property crimes activity report
